Butyl Flash Flashing Tapes

Our Butyl Flashing is designed to strip in or flash straight window frames, doors, and other construction transitions and penetrations. In both hot and cold temperature ranges, Butyl Flash will provide additional adhesion. Butyl Flash can be applied from 15°-115°F.

Poly Wall® Butyl Flash Window/Door Tape is a self-adhering, self-sealing, waterproof butyl based asphalt tape laminated to polyethylene film. The flashing is supplied in rolls, with an easy to remove film release liner. Butyl Flash® is available in 20 mil thickness and a variety of roll sizes.

- **Available in 4", 6", 9" and 12" widths**
- **Self-adhering, self-sealing**
- **Flash door & window frames**
- **Easy to remove film release liner**
