

## Opening the Window to better Waterproofing Flashing Options

Safeguard new or renovated residential window & door installations from unwanted air, moisture and mold with Professional Grade Flashing products.

### Traditional Method

## WindowSeal® Flashing Tapes

WindowSeal® Window Flashing Tapes are used to strip in or flash straight window frames, door frames, and other construction seams.

WindowSeal® is a self-adhering, self-sealing tape consisting of rubberized asphalt waterproofing coating, laminated to polyethylene film. The coating is supplied in rolls, with an easy to remove film release liner. WindowSeal® is available in both 20 mil, and a variety of widths to meet various needs.

WindowSeal® is AAMA-711 Verified.

#### Companion Products:

- ArcFlash™ for arched windows
- AlumaFlash™ UV resistance
- Butyl Flash for use in cold climates
- PolyBond™ Liquid Adhesive is used to improve adhesion

### New Technology

## Blue Barrier™ Flash 'N Wrap™ 2400

Blue Barrier™ Flash 'N Wrap™ 2400 is designed as a liquid applied window & door flashing. Easily applied with a roller, Flash 'N Wrap™ 2400 replaces traditional window tapes. No more worrying about your tape sticking or tearing when your window is installed. Flash 'N Wrap™ 2400 dries quickly to a tough, permeable, continuous membranes that is durable enough to withstand the installation of even the heaviest window or door and protect your investment for years.

Blue Barrier™ Flash 'N Wrap™ 2400 single-stage application provides the most effective air, water, and mold defense on the market.

#### Substantial benefits include:

- Tenacious adhesion, no gaps
- Easy application in wet conditions
- No primers / No mixing
- Very Durable
- Eco-friendly, low VOC's
- Fully compatible system with our air barrier products
